FILM 4075 Facial Animation

2nd Semester 2018-2019

Course Instructor: Dr Lee Kai Wah

This course is designed to enrich the communicative power of character animation with focuses on lip synchronisation, facial expression and facial anatomy, eyeballs and eyebrows controls, head movement and tilt direction.

From Emotion and Animation

STEM education is rising but not computer animation which has earned a much bigger role in our lives through mobile apps and computer games. Together with Shun Tak Fraternal Association Yung Yau College Mr. Owen Chan and students who have received numerous international awards on computer animation, the instructor and students of this course will conduct workshops for secondary school arts teachers so that they could bring back this creative media as well as insights on emotional intelligence to their classrooms.

Did You Know?

STEM education was first proposed in the 2015 Policy Address.
